### Profile

Detail oriented and self-motivated self-taught frontend engineer with a background in mechanical engineering. Highly skilled in writing client-side JavaScript with a focus on building reusable components using React.JS and translating designs into accessible, responsive and functional applications.

### Work Experience

**Code reviewer (Volunteer) – [Scrimba](#)**

**MAY 2022 – PRESENT**

- Conducts peer code review with other students and share ideas on best approach to writing DRY codes using HTML, CSS, and JavaScript
- Assists other students with technical issues.
- Engages in pair programming with other students to solidify concepts and skills.

**Technical Assistant – Brightway Transport and Logistics Ltd.**

**FEBRUARY 2020 – MAY 2022**

- Created and ran workshops for technicians and mechanics which reduced workplace accidents by over 80%.
- Oversaw journey management and driver's welfare.
- Directly involved in negotiating maintenance parts procurement for company trucks.

### Relevant Achievements

- Through regular orientation and enlightenment programs, me and my team reduced road accidents drastically.

### Projects

**Movie Watchlist App – [View Project](#)**

The Watchlist App allows users search for movies of their choice using the movie title, and saving their favourites to a watchlist as a reference.

**Built with:** HTML, Tailwind CSS, React.JS, Rest API, and Vite.

**Deployment:** Vercel

**Typing Speed Checker – [View Project](#)**

Speed Checker is an app that allow users to measure their typing speed in seconds by getting a word count when their set time elapse

**Built with:** HTML5, CSS, React.JS

**Deployment:** Vercel
